All,

well been trying to get some time playing with my new Omni VI.
Last couple of nights ended up on the lower end of 80 meters with
about 3 watts to a Lightning Bolt Quad using a tuner to get it to
work on 80. I have had some nice long chats with no problems.
Maybe I could meet some of your QRP+ people one of these evenings.
Sure would like to hear the QRP+ on SSB.

I am considering selling my whole Argonaut 509 station.. with
filter and keyer and even have small Palomar 50 watt amp that I
used for 40 meters SSB on the road.. made a nice set up.. hardly
ever used the amp. Only reason I would sell is if I decide to buy
the QRP+.. but may still be hard to get rid of this rig..

Subject: QRP+

Hello all

Does the QRP+ have the capability to receive AM, as in DX
like the BBC, or other AMSW broadcast?

Subject: What this ww cw business?

Hi all,

With everyone gearing up for the cw ww I wonder is there any place in the action for a newcomer? I have five weekends worth of operating (and 250 QSO's) under the key and go at about 16wpm.

What would a typical contest QSO be? How does the scoring system work and what does jargon like multipliers mean?

Lots of questions but would like to join in the fun and spread around a few points.

See ya all there,
